TYPE: "COMPACTA" FOLDING ROOM DIVIDER

GENERAL DETAILS

A durable extruded PVC folding door and room divider for commercial and domestic applications for aperture sizes:

Width: From: 600mm to 20000mm Height: From 200mm to 2650mm

(Widths greater than 10000mm shall be centre opening.)

CONSTRUCTION

Panel

Extruded PVC with double skinned honeycomb construction.

Panel thickness: 10mm

Panel stack: Static 100mm plus 125mm per metre (single door)

Glazing option

Clear bevelled or frosted acrylic windows with a matching extruded pvc frame can be incorporated into the panels. Each window has a visible size of 45mmx290mm.

Finishes

Blend White, Beech, Oak and Mahogany effects

Hinge

Solid PVC extrusion.

Panel width: 120mm (including hinge)

(For pocket stowage allow 170mm between pocket walls.)

SUSPENSION

Single point suspension by means of articulating twin wheel carriers with Delrin® grooved wheels to moulded shank connected to the panel.

TRACK

Extruded anodised bronze aluminium twin rail section.

Width: 28mm Height: 23mm

Matching wood track cover (optional.)

Width: 65mm Height: 33mm

JAMBS

Extruded PVC with dual purpose reversible section to connect with panels and receive door stile section.

DOOR STILE

Dimension: 60mm x 12mm

Twin magnetic catch (standard) or inset lock and key (optional).

Fitted extruded PVC door pulls – height: 200mm. Positioned according to panel height.

CLEANING

Anti-static polish and cloth or can be low pressure steam cleaned.

HISTORY

First produced more than 20 years ago.

The product has been developed to be very acceptable for today's needs.

A special feature is the ability to release the fixed jamb from the panel to gain access from the stacking end of the door should it be obstructed in an emergency situation.
